

Juki Feeder Storage Cart

JUKI FEEDER
STORAGE CART

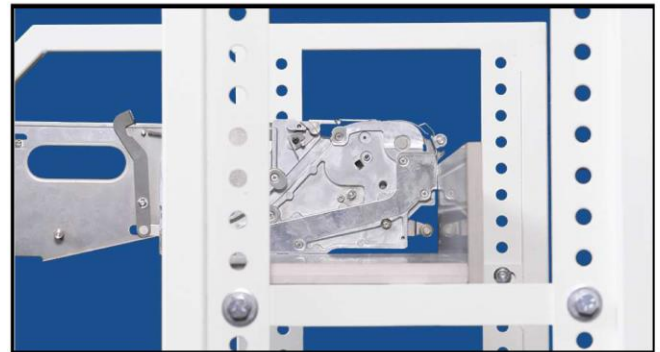

AGI's model 206 cart is a flexible and modular design. For Juki feeders the 206 cart design is a must. The 700 feeder shelf cart can house up to 51 (8mm) feeders per shelf. It has 103 feeder slots on 8.5mm centers. The shelves can accommodate other size feeders. The rugged, hard anodized aluminum tooling, properly locates the feeder dowel and safely allows the feeder clamp to secure to the shelf. AGI has feeder tooling for your 700 series up through 2000 series feeders. All can be mounted on the cart frame. The frame design also completely encloses the feeder, ensuring no damage from banging.

To order, simply specify the 206 frame and the type and quantity of feeder shelves you need.

Shown with Juki-Zevatech 700 Series Feeder

FEATURES AND BENEFITS

- Accommodates up to (3) adjustable, feeder shelves. The shelves bolt to the frame on 2" centers.
