

Juki Feeder Storage Cart

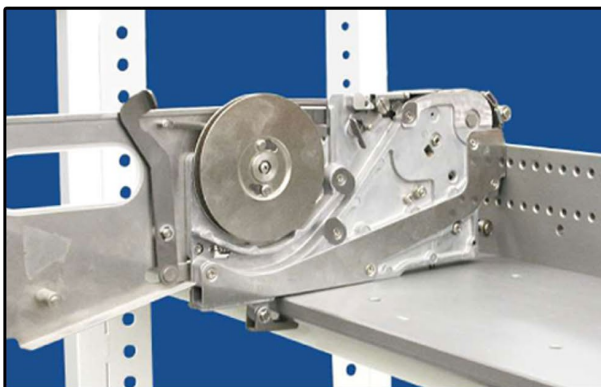

FF, CF, CP and RF Series

JUKI FEEDER
STORAGE CART

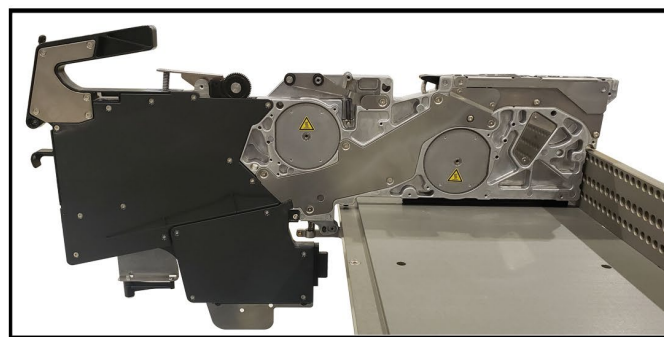

Shown with Juki
FF Series Feeder

AGI's model 206 cart is a flexible and modular design. We have feeder tooling for your FF, CF, and CP Mechanical series feeders. We also have tooling for your RF Electric series feeders. Both types can be mounted on our 206 cart frame. Each feeder shelf can hold up to 51 (8mm) feeders. There are 103 feeder slots on 8.5mm centers to support all sizes of feeders. The rugged, hard anodized aluminum tooling properly locates the feeder dowel and safely allows the feeder clamp to secure to the shelf. The frame design also completely encloses the feeder, ensuring no damage from banging.

FEATURES AND BENEFITS

- Accommodates up to (3) adjustable, feeder shelves. The shelves bolt to the frame on 2" centers.
- Rugged 3/8" thick machined Aluminum feeder tooling. Hard anodized for long life.
- Feeders are completely enclosed within cart frame to prevent damage or banging.
- Feeders supported per manufacturer's specifications.
- Rugged 1" Square box tube welded steel construction for stability.
- Performa cushion-ride conductive swivel casters 5" diameter, with locks.
- Baked epoxy painted textured finish, Cream.
